Service Offerings

- **Consulting and Advisory Services** — Tailored advisory and management consulting services to Federal Executives to address business and technical challenges. Leadership and guidance in the areas of Strategic Planning, Market Research, Alternative Analysis, Enterprise Architecture, and Program Management.
- **Automation and Optimization** — Automation and optimization of customer business processes, Business Process Management, Robotic Process Automation, and Customer Relationship Management services.
- **Cloud and Infrastructure** — Custom solutions driven by individual business needs, encompassing design, migration, and operations to allow ongoing optimization of an organization's performance and budget. Cloud Readiness Analysis, DevOps, Cloud Migration, Containerization, Middleware Engineering, Network Engineering, and Mainframe Services.
- **Cybersecurity** — Robust cyber consulting services including threat assessment, remediation, privacy, solution analysis and reporting, specializing in FISMA, NIST, FedRAMP and IRS Pub 1075 requirements for all risk level environments. Expertise in Identity and Access Management (IAM), DevSecOps, Vulnerability Management, Incident Management, and Authority to Operate (ATO) Services.
- **Digital Transformation and Modernization** — Technology agnostic, SAFe implementations to develop new and modernize existing enterprise systems ranging from mobile to mainframe. Designing and implementing modern digital experiences for our customers via Mobile App Development, Enterprise Content Management, Single Page Applications, User-Centered Design, Integration with Legacy Systems, and Modernizing Legacy Systems.
- **Identity and Access Management** — Complete scalable and extensible enterprise security for IAM, identity federation, and audit and compliance. Deep experience with highly visible, public facing websites supporting millions of users, as well as implementation in multi-datacenter and FedRAMP cloud environments.
