

About Us

Founded in 2013, **Jazz Solutions, Inc. (JSL)** is an **economically-disadvantaged, woman-owned, SBA certified 8(a) small business** serving federal, state, and local governments. Our headquarters is located in Ashburn, Virginia.

Who We Serve

Currently, JSL is leading 20 prime contracts and supporting large systems integrators on another dozen high profile programs. **Our IT solutions are delivering meaningful results through nearly a quarter of a billion citizen interactions through technical and management advisory services, system and application development, system integration, identity and access management, and cloud services, to name a few.**

Company Highlights

- JSL's 8(a) certification gives agencies the ability to expeditiously award us sole-source contracts up to \$4.5M.
- JSL has facilities in DC, Maryland, and two in Virginia.
- JSL acquired Lark Federal in 2020 and PPS InfoTech in 2021.
- JSL continues to grow, adding our Defense and Intel business unit in 2022.

Our Solutions

Identity, Credential, Access Management

JSL provides ICAM services for federal programs and commercial customers. **Our ICAM implementations provide customers with reliable, secure solutions across multiple ICAM technologies.** We support everything from full cloud ICAM Software-as-a-Service (SaaS) implementations to complete on-premises software running in private data centers or in public cloud Infrastructure-as-a-Service (IaaS) applications.

Cybersecurity

JSL brings our philosophy of a comprehensive view of IT security and compliance and integrates security, assessment, audit, compliance, and other security activities and processes with the overall system development lifecycle. We leverage dedicated cybersecurity professionals to guide information system programs from development to the **ATO assessment to Ongoing Security Authorization (OSA) assessments** to system disposal.

System & Application Development

JSL specializes in providing system development, application development, and backend infrastructure. Our range of services includes developing new applications/systems that provide tailored solutions, system modernization which involves upgrading legacy products and systems to newer and more efficient technologies.

System Integration

JSL has expertise in designing, building, and integrating complex IT systems. This experience includes modern service mesh and API gateway approaches, as well as older web service and message-oriented middleware integration techniques.

Low-code Development

JSL offers low-code, full custom development, and hybrid solutions using both approaches; we select the development approach and platform according to what will fulfill the immediate need and be successful long-term. Our low-code platform partners include Appian, Fluxx Grantmaker, and OutSystems.

Advisory and Consulting

JSL partners with our customers to provide services in the areas of **strategic planning, alternative analysis, enterprise architecture, and program management.**

“Great job JazzSol team! Your dedication and effort is much appreciated and noted at the highest level of our agency.”
Federal Student Aid CEO

“Thank you for your hard work. The JazzSol Team really makes my job easier!”

Why Jazz Solutions?

JSL designs, builds, operates, and manages solutions customized to each customer's unique mission and business objectives. We understand there is not a "one size fits all approach" to customer success. **Our project experience ranges from assigning a single, specialized subject matter expert to large-scale mission-critical system deployment affecting nearly a quarter-billion citizens.** We successfully serve our customers by customizing solutions that blend industry best practices, emerging technology, high caliber professional talent, and a decade of gained experience.
