IDENTITY, CREDENTIAL, ACCESS MANAGEMENT

Bring Identity Relationships Under Control

Managing and protecting access to sensitive customer, business, and organizational data and systems is critical to any organization's success. Failure to do so, enables external hackers and malicious insiders to target and exfiltrate sensitive information that could erode trust and cripple an organization's operations. Controlling access to enterprise systems and data are paramount to protecting data and maintaining trust. Both the GSA Zero Trust Reference Architecture and the CISA Zero Trust Maturity Model list user/identity as the first pillar of zero trust practice. Jazz Solutions, Inc. (JSL) can improve your organization's security posture by delivering the appropriate ICAM stack for your environment.

JSL ICAM Solutions

Jazz Solutions, Inc. (JSL) provides ICAM services for federal programs and commercial customers. **Our ICAM implementations provide customers with reliable, secure solutions across multiple ICAM technologies.** We support everything from full cloud ICAM Software-as-a-Service (SaaS) implementations to complete on-premises software running in private data centers or in public cloud Infrastructure-as-a-Service (IaaS) applications.

Results Driven ICAM Solutions
JSL's identity, credential, and access management services provide governance and security to critical government systems; our ICAM systems have securely performed more than 1 billion authentications.
JSL's Alliances Represent the *Best* in the ICAM Industry.

Solution Offerings

Identity and Access Management (IAM)

Securely connect every enterprise user to the right level of access.

Consumer Identity and Access Management (CIAM)

Control customer access to business applications and digital services.

Privileged Access Management (PAM)

IAM based on the principle of least privilege, which is crucial to modern cybersecurity best practices.

Zero Trust Architecture

Both the GSA Zero Trust Reference Architecture and the CISA Zero Trust Maturity Model list user/identity as the first pillar of Zero Trust practice.

JSL's ICAM Solutions provide:

- **Complete Scalable and Extensive Enterprise Security for ICAM, Identity Federation, and Audit Compliance**
- **Deep Experience with Highly Visible, Public Facing Websites Supporting Millions of Users**
- **Implementation of Multi-Datacenter and FedRAMP Cloud Environments**

Federal Student Aid (FSA) Access and Identity Management System (AIMS)

JSL built and continues to operate AIMS, FSA's ICAM solution. AIMS provides identity authentication and access services to approximately <u>99,000 users</u> of FSA applications for partners, employees, and contractors. It provides standards-based options for onboarding FSA business applications. AIMS supports standards-based integrations using SAML, OAuth, and SCIM as well as support for reverse proxy integrations and custom APIs. **AIMS provides the core technology components and the associated processes/workflows necessary for implementing an enterprise security system for FSA's 20+ line-of-business applications.** JSL's approach to AIMS operations provides many benefits to FSA:

- <u>Reductions in costs</u> **for application development, maintenance, hardware, and software**
- **Establishment of a common set of technical standards and reusable business processes that multiple applications use.**

Federal Student Aid (FSA) Person Authentication Service (PAS)

JSL designed, developed, implemented, and continues to operate PAS, the FSA's non-privileged user CIAM solution <u>supporting 85 million</u> **applicants, students, parents, and borrowers**. PAS routinely manages more than <u>two million authentications per day—more than 50 per second</u>. The PAS system leverages IBM Security Verify Access for access management and federation services, combined with a custom designed identity repository and custom-built Application Programing Interfaces (API), to support application integration. JSL provides Subject Matter Experts on commercial off-the-shelf products and is responsible for installation, configuration, upgrades, troubleshooting, and maintenance in support of evergreening efforts and high availability architecture.

The JSL PAS ICAM solution has achieved:

- **85 million user accounts**
- **190 million annual authentications**
- **2 million single day authentications**
- **21 million annual registrations**
- **260,000 single day account registrations**

About JSL

Founded in 2013, **Jazz Solutions, Inc. (JSL)** is an economically-disadvantaged, woman-owned, SBA certified 8(a) small business serving federal, state, and local governments. Our headquarters is located in Ashburn, Virginia; JSL has other office locations in Virgina (Virginia Beach), D.C, and Maryland.

JSL designs and manages solutions customized to each customer's unique mission and business objectives. We understand there is a not a "one size fits all approach" to customer success. **Our project experience ranges from assigning a single, specialized subject matter expert to large-scale mission-critical system deployment affecting nearly a quarter of a billion citizens.** We successfully serve our customers by customizing solutions that blend industry best practices, emerging technology, high caliber professional talent, and more than a decade of gained experience. **Currently, we are leading 20 prime contracts and supporting large systems integrators on another dozen high-profile programs that are delivering meaningful results through technical and management advisory, system/app development and integration, identity and access management, and cloud services, to name a few.**

The result of our customer engagement includes award-winning products, 100 percent positive CPARS, and lasting partnerships built on trust and success.
