JSL
Engineered to Execute™

Jazz Solutions Inc.
Protecting access to sensitive customer and organizational data

Jazz Solutions, Inc. (JSL) knows that controlling access to enterprise systems and data is paramount to maintaining trust.

Our Identity, Credential, and Access Management (ICAM) implementations provide customers with reliable, secure solutions across multiple technologies. Whether implementing full cloud Software-as-a-Service (SaaS), on-premises software in data centers, or cloud Infrastructure-as-a-Service (IaaS) environments, JSL has the expertise to deliver tailored solutions.

We ensure that our customers achieve the appropriate assurance levels outlined in NIST SP 800-63 Digital Identity Guidelines. We also support the evolving security needs of Zero Trust Architectures, ensuring that identity solutions are aligned with the overall security posture of these frameworks.

IDENTITY & ACCESS MANAGEMENT (IAM)

Securely connecting every enterprise user to the right level of access.

CUSTOMER IDENTITY & ACCESS MANAGEMENT (CIAM)

Controlling customer access to business applications and digital services.

PRIVILEGED ACCESS MANAGEMENT (PAM)

IAM based on the principle of least privilege, crucial to cybersecurity best practices.

ZERO TRUST ARCHITECTURE

Platform support provides performance and security monitoring. Solutions support provides analysis for continuous system enhancement and maintenance.

IDENTITY PROOFING

JSL utilizes TransUnion services to provide third-party identity proofing to support user verification and secure applications.

CLIENT SUCCESS STORIES

Access & Identity Management System (AIMS) U.S. Department of Education

JSL developed and operates the **Access and Identity Management System (AIMS)** for Federal Student Aid (FSA). **AIMS supports approximately 99,000 users,** including partners, employees, and contractors, by providing secure, standards-based authentication and access for 20+ applications. AIMS enables seamless integrations across applications using SAML, OAuth, SCIM, and custom APIs. By implementing common technical standards and reusable processes, **JSL's solution reduces FSA's costs for development, maintenance, and hardware**.

Person Authentification Service (PAS) U.S. Department of Education

JSL developed and operates the **Person Authentication Service (PAS),** a Customer Identity and Access Management (CIAM) solution for Federal Student Aid (FSA) non-privileged users, **including 100 million+ students, parents, and borrowers**. Handling **2 million+ authentications daily**, PAS provides seamless access management across applications. Built with IBM Security Verify Access, PAS integrates custom APIs and a purpose-built identity repository to support robust authentication. With **190 million annual authentications and 21 million new registrations each year**, PAS empowers FSA to deliver secure, dependable access to its vast user base.
