CYBERSECURITY

JSL
Engineered to Execute™

Jazz Solutions Inc.

Protecting data and information systems from ever-evolving threats

Jazz Solutions, Inc. (JSL) stands at the forefront of cybersecurity defense for federal and civilian agencies.

By integrating the latest technology with robust strategies, JSL proactively protects information, ensuring the confidentiality, integrity, and availability of critical data systems.

THREAT DETECTION & RESPONSE

JSL has the knowledge, skills, and tools to identify threats, assess impacts, and provide real-world solutions to ensure customer systems remain secure.

VULNERABILITY RISK MANAGEMENT

JSL develops innovative approaches to help customers quickly process, analyze, evaluate, and remediate their most critical vulnerabilities.

SYSTEM SECURITY

JSL's experts assess security risks, evaluate the effectiveness of implemented controls, and apply best practices to ensure compliance with regulations and mandates. We secure systems from unauthorized access and hacking attempts, keeping data safe from internal and external threats. JSL quickly remediates findings from security and risk assessments and maintains FISMA-required documentation as evidence.

COMPLIANCE & AUDIT SUPPORT

JSL retains subject matter experts in risk assessment, audit preparedness and response including NIST, OIG, A-123, ISO 27000, IRS PUB 1075, CMCC and more. Our staff hold certifications, such as CISSP, CCSP, and Certified Ethical Hacker. JSL understands the implementation of security control standards as identified in the GAO Greenbook, Standards for Internal Controls in the Federal Government.

KEY METRICS

- **250 million (and climbing) citizen interactions successfully processed**
- **100% positive CPARS rating**
- **98% employee retention rate**
- **83% staff hold IT &/or PM certifications**
- **40+ years of experience in cybersecurity**
- **30+ current contracts/20 JSL Prime**

RECENT PROJECTS

Federal Student Aid (FSA) Person Authentication Service (PAS) and Access & Identity Management System (AIMS)

JSL's PAS & AIMS Systems support 100+ million users and 2+ million authentications. JSL has evaluated all risk vectors, including in-place controls, to ensure both solutions meet NIST SP 800-137 and OMB's A-123 App. A requirements for the last 7 years. PAS & AIMS meet the requirements of a FISMA High System with a full suite of inherited, inheritable. and system-implemented security controls, which are described in JSL's comprehensive system security documentation.

FSA Federal Taxpayer Information Module Services

JSL led the secure integration of critical IRS tax data within the Federal Student Aid systems. The team created a security system that incorporates the high-water mark of IRS PUB 1075, NIST 800-53 Rev. 5, and the FedRAMP moderate baseline. This project obtained the Education Department's Authorization to Operate (ATO) on the first submittal, assuring FSA and the IRS that JSL's solution met or exceeded the latest security standards.
