LOW-CODE SOLUTIONS

Jazz Solutions Inc.

Rapidly innovating and optimizing to save time and money

JSL
Engineered to Execute™

Jazz Solutions, Inc. (JSL) understands that government agencies strive to engage citizens with user-friendly digital experiences.

We are experts at determining the best approach for our clients, whether it be low-code development, full custom development, or a hybrid solution. Low-code solutions can help agencies rapidly innovate new solutions; easily modernize user experience for existing applications; and enable efficient compliance with various standards.

STRATEGY AND DESIGN

Platform strategy assessments determine the best way to leverage low-code platforms and select the right platform to meet infrastructure, tech stack, and business goals/requirements.

ARCHITECTURE

Architecture services to design scalable applications that integrate with current tech stacks and infrastructure to optimize interoperability.

DEVELOPMENT & PROJECT MANAGEMENT

Translate requirements into full-scale, quality tested applications using low-code platforms within the prescribed architecture. JSL leverages Scrum, Agile, and project management expertise to deliver within scope, schedule, and budget.

OPERATION & SUPPORT

Platform support provides performance and security monitoring. Solutions support provides analysis for continuous system enhancement and maintenance.

CLIENT SUCCESS STORIES

JSL partnered with Federal Student Aid (FSA) to streamline its business processes with the **new Enterprise Business Management System (EBMS), built on the Appian Platform**. Our team implemented the Correspondence Management System (CMS) in just five months, allowing FSA to manage internal and external communications, FOIA requests, and media inquiries more efficiently. The **new system modernizes FSA's workflow**, enabling teams to collaborate seamlessly and meet critical deadlines. JSL's ability to deliver this solution quickly showcases **our commitment to solving client challenges with speed and precision**.

JSL partnered with the DOL's Job Corps to **modernize its case management system**, streamlining operations for the **nation's largest residential career training program**. Leveraging the **OutSystems low-code platform**, JSL unified multiple systems into one easy-to-use application. The new system offers an intuitive 508-compliant experience, smooth file transfers, and robust reporting, including workload and admission insights. **By transforming complex processes into an efficient digital solution, JSL empowered Job Corps staff to focus on what matters: supporting participants' success**.
